

Keystone Jack with Punch-Down Termination

This keystone jack is designed with a punch-down termination block for connecting network cables. It features gold-plated contacts to ensure reliable signal transmission.

Overview

Professional Keystone Jack Connectivity

This Keystone jack with punch-down termination is engineered for high-performance structured cabling systems. Featuring gold-plated contacts, it ensures reliable signal transmission for both data and voice applications. The punch-down block design allows for secure, long-lasting wire termination, compatible with industry-standard T568A and T568B wiring schemes.

Technical Specifications

Termination Method	Punch-down
Supported Wiring Schemes	T568A, T568B
Contact Plating	Gold-plated

Applications

Primary Applications

- Data networking
- Voice communication
- Structured cabling systems
