

Kitchen Ventilation Hood with Integrated Lighting

This range hood is designed to remove smoke, grease, and other cooking byproducts from the air. It features integrated lighting, a digital display, button controls, and a filtration system.

Product Overview

Professional Kitchen Ventilation

The CTC-758-900S ventilation hood is engineered to maintain a clean kitchen environment by efficiently removing smoke, grease, and airborne particles. Featuring a sophisticated stainless steel and black aesthetic, this unit integrates high-performance airflow technology with dedicated surface illumination. Designed for durability and ease of maintenance, it provides a robust solution for professional-grade air management.

Technical Specifications

Model Number	CTC-758-900S
Operating Voltage	V

Features

Control Interface	Digital Display, Button Controls
Integrated Illumination	Yes

Construction

Materials

- Stainless Steel
- Black Elements
