

Kitchen Ventilation Range Hood

This range hood is designed for kitchen ventilation. It features integrated controls for fan speed and lighting and is equipped with efficient filtration to remove smoke, grease, and odors.

Product Overview

Professional Kitchen Ventilation Solution

The CKR-200-U102A is a high-performance stainless steel range hood engineered for effective kitchen ventilation. Its sleek, modern cylindrical chimney design provides a wide capture area to efficiently manage smoke, grease, and cooking odors. Equipped with user-friendly integrated controls for adjustable fan speed and lighting, this unit offers both aesthetic appeal and reliable functionality for demanding commercial or home kitchen environments.
