

Kitchen Ventilation Range Hood

This range hood is designed for kitchen ventilation. It features a modern design with a glass canopy, integrated lighting, and multiple filter panels for wall mounting.

Product Overview

Professional Kitchen Ventilation

This high-performance wall-mounted range hood is designed to maintain clean air quality in professional or residential kitchen environments. Featuring a sleek stainless steel structure combined with an elegant glass canopy, it effectively extracts smoke, grease, and cooking odors. Integrated lighting provides enhanced visibility, while multiple filter panels ensure high filtration efficiency for demanding cooking surfaces.

Design and Build

Construction Material	Stainless Steel, Glass
Mounting Type	Wall-mounted

Performance

Key Features

- Integrated illumination system
- Multi-panel filtration system
- Glass canopy design
- Heavy-duty grease extraction

Primary Application

Kitchen Ventilation • Odor Control • Smoke Removal
