

KN95 Mask Ear Loop Attaching Machine

The KN95 Mask Ear Loop Attaching Machine is designed for efficiently attaching ear loops to KN95 masks. This automated system ensures precise and consistent fusion, enhancing the production speed and quality of KN95 masks.

Overview

Automated KN95 Ear Loop Fusion

The KN95 Mask Ear Line Fusion Machine is an automated system designed for the efficient and consistent attachment of ear loops to KN95 masks. It features a user-friendly interface that allows for easy parameter adjustment, ensuring high-quality production standards. This machine streamlines the manufacturing process, helping to enhance both production speed and the final quality of the masks.

Performance

Production Capacity

300 PCS/HOUR

Output Rate

Application

KN95 Masks, Ear Loop Attachment

Technical Features

Operation

Automated
