Product Overview

Professional Knife Switches

These manually operated knife switches are engineered for reliable electrical circuit isolation and power distribution. Featuring a visible break design, they allow for easy inspection and enhanced safety during maintenance. Built with durable materials, these switches are suitable for a wide range of industrial and commercial electrical applications.

Electrical Ratings

Available Amperages	32A, 60A, 100A
Max Voltage	600 V

Configuration

Pole Configurations

- 2P (Double Pole)

Switch Types

DPDT • Open Type • Enclosed Type

Design Features

Key Features

- Visible break design
- Copper blades
- Insulated handles
- Transparent housing options
- Optional indicator lights

Primary Applications

Power Distribution, Industrial Systems, Commercial Systems, Residential Systems
