

Knotted Wire Cup Brush for Angle Grinders

This cup brush features a knotted wire design for effective surface preparation. It is suitable for use with angle grinders.

Product Overview

Professional Surface Preparation Tool

This knotted wire cup brush is engineered for heavy-duty surface preparation, weld cleaning, and effective rust removal. Designed for compatibility with standard angle grinders, it features a robust construction that stands up to demanding industrial tasks. The 0.5mm steel wire provides the necessary stiffness for aggressive material removal while maintaining durability during extended use.

Technical Specifications

Wire Diameter	0.5 mm
Mounting Thread	M14
Diameter Range	65-75mm
Material	Steel Wire

Application

Primary Applications

- Surface preparation
- Weld cleaning
- Rust removal

Compatible Tools

Angle Grinder
