

Ku-Band Satellite Communication Antenna

This high-performance antenna is designed for Ku-band satellite communication. Its robust mesh reflector ensures optimal signal gain and minimal wind resistance.

Overview

High-Performance Ku-Band Solution

This Ku-band satellite communication antenna is engineered for reliable connectivity in both residential and commercial environments. Featuring a robust mesh reflector design, the unit provides optimal signal gain while significantly reducing wind resistance. Built with durable materials, it is designed to withstand harsh environmental conditions, ensuring consistent, long-term performance.

Technical Specifications

Application Suitability

- Residential Satellite Connectivity
- Commercial Communication Systems

Frequency Band	Ku-Band
Reflector Design	Mesh Reflector
Key Features	High Signal Gain, Low Wind Resistance, Weather Resistant, Precision Mounting
