

Laboratory Chemical Storage Bottles

These bottles are designed for storing chemicals in laboratory environments. They provide a secure containment solution for various chemical substances.

Product Overview

Professional Laboratory Chemical Storage

These laboratory chemical storage bottles are designed for secure containment of chemical solutions and fibrous materials. Ideal for controlled environments, these containers support accurate testing and preservation protocols. Their robust construction ensures reliability during chemical processing and experimental applications.

Technical Specifications

Concentration

47 %

Concentration

Batch Identification

0.8.10646

Usage & Application

Storage Capabilities

- Chemical solutions
- Fibrous materials
- Submerged samples

Primary Applications

Chemical Processing, Material Preservation, Laboratory Testing
