

Laboratory Drying Oven for Baking and Sterilization

This oven provides drying, baking, wax-smelting, and sterilization for laboratories and industrial settings. It is suitable for testing, research, quality control, and production environments.

Overview

Versatile Laboratory Drying Oven

This professional-grade drying oven is designed for a wide range of applications including drying, baking, wax-smelting, and sterilization. It is an essential tool for scientific research institutions, universities, and industrial testing facilities. Featuring robust construction and precise temperature control, it ensures uniform heating and reliable performance for sensitive laboratory processes.

Construction & Materials

Interior Material	Mirror stainless steel or galvanized plate
Exterior Material	Top-grade steel

Performance & Control

Operational Capabilities

1 Included

Timing Function

1 Blower

Circulation System

Temperature Controller	Digital display microcomputer controller
Safety Features	Over-temperature protection, High-temperature continuous operation, Uniform heat distribution
Advanced Options	Yes

Applications

Primary Applications

- Drying
- Baking
- Wax-smelting
- Sterilization

Suitable Industries

Industrial • Mining • Scientific Research • Testing Institutions • Universities & Colleges
