

# Lambswool and Cashmere Polishing Pads

These circular pads are made of soft lambswool and cashmere. They are suitable for use in machinery applications requiring polishing.

## Product Overview

### Premium Polishing Solutions

These professional-grade polishing pads are engineered for precision and surface care. Available in both lamb's wool and cashmere variants, they offer distinct textures suitable for specialized industrial applications requiring gentle, absorbent, or high-finish surfaces. With a consistent 4-inch diameter, these pads are designed to integrate seamlessly into your existing machinery or polishing equipment setup.
