Product Overview

Professional Laminated Guide Bar

This high-performance laminated guide bar is engineered for durability and reliability in demanding forestry and garden landscape applications. Constructed from premium 60Si2 steel alloy, it is designed to withstand extreme temperature fluctuations, ensuring consistent performance in both heat and cold. Precision engineering reduces vibration and ensures smooth, efficient cutting for both professional and home users.

Technical Specifications

Key Components

- USA-sourced sprocket
- Swiss-manufactured rollers

Available Lengths

6 inch - 42 inch

Primary Material

60Si2 Steel Alloy

Performance Features

Performance Highlights

1 Reduced

Vibration Level

1 High

Cutting Precision

Environmental Resistance
