

Large Bow Shackle

This is a large bow shackle designed for lifting applications. It conforms to B.S.3032 standards.

Product Overview

Heavy-Duty Bow Shackle

This high-strength bow shackle is engineered specifically for demanding lifting and rigging applications. It provides a secure, reliable connection point for ropes, chains, and slings, making it an essential component for heavy-duty operations. Built to meet rigorous safety standards, it is an ideal choice for marine, construction, and industrial environments.

Technical Standards

Compliance	B.S.3032
Surface Treatment	Galvanized

Application

Recommended Environments

- Marine
- Construction
- Industrial

Primary Function	Heavy-duty lifting and rigging
