Product Overview

High-Performance Large Push Button Switch

This large push button switch is designed for durability and ease of use in both residential and commercial environments. Featuring high-quality silver alloy contacts, it provides excellent resistance against electric arcs and melt welding, ensuring a long operational lifespan. The minimalist, glossy white design fits seamlessly into modern interiors while offering a highly accessible interface for users.

Durability & Materials

Material Performance

- Electric arc resistance
- Melt weld protection
- Good electrical conductivity
- Lasting elasticity

Contact Material	High quality silver alloy
------------------	---------------------------

Socket Material	Phosphor bronze
-----------------	-----------------

Operational Life	40000 cycles
------------------	--------------

Design & Configuration

Configuration	Double gang
---------------	-------------

Surface Finish	Smooth, glossy white
----------------	----------------------

Compliance & Quality

Certifications

CE • CB • BS • SASO • GOST • RoHS
