

Laser Welded Diamond Saw Blade

This laser welded diamond saw blade is designed for general-purpose cutting. It is suitable for cutting an extensive range of masonry and concrete materials including bricks, blocks, slate, and stone.

Product Overview

General Purpose Laser Welded Blade

This high-performance diamond saw blade is engineered for precision cutting across a variety of hard materials. Featuring robust laser-welded segments, it offers enhanced durability and superior heat resistance for demanding cutting applications. Designed to minimize vibration and maximize lifespan, this blade is an ideal solution for professionals in construction and masonry.

Product Features

Key Features

Laser Welded, General Purpose, Key Slot Design, High Heat Resistance, Low Vibration
