

# Laundry Washing and Drying Machine

This machine combines washing and drying functionalities. It is designed to clean and dry clothes in a single appliance.

## Product Overview

### Industrial Laundry Solutions

This combined washing and drying machine offers a high-capacity, space-saving solution for professional laundry environments. Designed for efficiency and durability, it handles large loads with precision temperature and cycle control. The unit integrates advanced cleaning technology to ensure optimal fabric care and high throughput for demanding business operations.

## Technical Specifications

### Capacity Overview

**25 kg**

Washing Capacity

**20 kg**

Drying Capacity

### Certifications

CE • ISO 9001

### Operational Modes

Washing, Drying, Combined Cycle

## Performance Details

### Cycle Efficiency

Metric	Performance
Average Wash Time	45-60 min
Drying Efficiency	High
