

LCD Display Module

This LCD display module is designed to display information in electronic devices. It provides a clear visual output for various applications.

Overview

Integrated Intercom Display Solution

This LCD display module is designed for professional multi-layer intercom systems, facilitating clear communication and monitoring between outdoor stations and indoor units. The system supports complex configurations involving video amplifiers, signal isolators, and central control units. It is engineered to integrate seamlessly with standard wiring protocols for reliable performance in residential or commercial building security setups.

System Architecture

Compatible Wiring Standards

- SYV75-5
- RVVP6X1.0
- RVV5X0.5
- RVV2X1.0
- RVV3X0.3

Supported System Components

Video Door Phones • Indoor Monitors • Video Amplifiers • Signal Isolators • Central Control Unit

Supported Power Supplies

DC12V, DC18V

Integration Features

Yes
