

# LCD Display Module

This LCD display module provides a visual interface for displaying information in electronic devices. It offers clear readability and is suitable for a variety of applications.

## Overview

### Versatile Solar Solutions

This collection features a diverse range of solar panels engineered for various applications, from portable charging devices to large-scale infrastructure like street lighting. With power outputs spanning from 1W to 200W, these modules provide flexible energy solutions for both specialized and general-purpose projects. Each unit is designed to meet specific power requirements, ensuring efficiency and reliability across different environmental conditions.

## Technical Specifications

### Power Output Range

**1 W**

Minimum Power

**200 W**

Maximum Power

### Voltage Ratings

36V

## Applications

### Intended Applications

- Portable chargers
- Highway signal lighting
- Solar street lighting
- Specialized round component applications

## Product Variants

### Model Specifications

Model Type	Power Output
Standard Panel	1W, 2W, 3W, 5W
Frameless Charger	6.2W
Round Component	5.5W, 60W, 100W
High Capacity	200W
