

Leather Flatbed Inkjet Printer

This flatbed printer is designed for printing on leather and other flat materials. It utilizes advanced inkjet technology to deliver high-quality prints with excellent durability and precise color control.

Overview

Versatile Flatbed Inkjet Printing Solution

This industrial-grade flatbed inkjet printer is designed for high-precision printing on a wide array of materials, including leather, glass, wood, metal, and stone. It features advanced inkjet technology that allows for printing on both flat surfaces and irregular, cylindrical objects. With an adjustable object height capacity of up to 17.5 cm, it is an ideal solution for customizing promotional items, industrial components, and luxury goods.

Technical Specifications

Maximum Object Height	17.5 cm
