

LED Display Electric Iron for Clothes

Electric iron designed for household use in ironing clothes. It features a temperature control system, a non-stick soleplate, a water tank for steam ironing, and safety features.

Overview

Professional Steam Ironing Solution

This electric iron features a modern LED display for precise temperature control, ensuring optimal results for various fabric types. Designed for efficiency and safety, it includes a non-stick soleplate for smooth gliding and an integrated water tank for steam and spray functions. Built-in safety mechanisms such as overheat protection and automatic shut-off provide peace of mind during household use.
