

LED Driver DC Transformer

This LED driver and DC transformer provides a stable DC power supply for LED lighting systems. It supports both 12V and 24V output, offering versatility for various lighting applications.

Overview

Compact LED Smart Driver

This ultra-thin LED smart driver is designed to provide a reliable and stable DC power supply for various LED lighting applications. Featuring a slim 15mm profile, it is ideal for space-constrained installations such as cabinet lighting and modern light fittings. The unit utilizes efficient switching power supply technology to ensure optimal energy conversion, consistent performance, and a prolonged lifespan for your connected LED fixtures.

Technical Specifications

Model Number	LD55-24V-40W
Input Voltage	200-220V AC
Input Frequency	50 Hz
Max Input Current	0.5 A

Output Performance

Output Voltage	24V DC
Output Current	1.66 A

Physical Characteristics

Thickness	15 mm
Max Operating Temperature (tc)	75 °C

Certifications & Compliance

Compliance Standards

CE • SELV • RoHS

Applications

Typical Applications

- LED Lighting Systems
- Cabinet Lighting
- General LED Fixtures
