

LED Illuminated Muffler

This muffler integrates LED lighting for visual enhancement. It features 12 LEDs within a stainless steel construction, designed for automotive lighting.

Product Overview

Innovative Illuminated Automotive Component

The LED Illuminated Muffler is a specialized automotive accessory designed to combine functional exhaust components with enhanced aesthetic appeal. Featuring an integrated lighting system, this unit utilizes 12 high-intensity LEDs to provide increased visibility and a distinct visual signature. Constructed from durable stainless steel, it is engineered for automotive lighting equipment applications requiring both robustness and style.

Technical Specifications

Model Number	HJ-E02
Material	Stainless Steel
LED Count	12 LEDs
Application	Automotive, Lighting Equipment, Ornamental
