Overview

Modular Indoor Gardening Solution

This indoor grow rack system is designed to support year-round plant cultivation, from seed starting to mature vegetables and flowers. Featuring a modular, connectable design, the unit can be configured in one, two, or three-layer arrangements to maximize vertical space. Integrated full-spectrum LED lighting promotes efficient photosynthesis, ensuring healthy and rapid plant development in any indoor environment.

Features

Lighting Features

- Full-spectrum LED grow light
- 3-stage brightness adjustment (30%, 60%, 100%)
- Integrated smart timer modes
- Optimized for photosynthesis

Smart Timer Settings

16h On / 8h Off, 8h On / 16h Off, 8h Off / 16h On, Manual/No Timer

Design & Versatility

System Configuration

1 Layer • 2 Layers • 3 Layers • Connectable Design

Suitable Plant Types

- Vegetables
- Herbs
- Flowers
- Tropical foliage
- Succulents
- Seed starting

Mobility

Yes
