

# LED Mini Lightbar for Emergency Vehicles

This LED mini lightbar is designed for emergency vehicles, providing high-intensity lighting for enhanced visibility. It features a magnetic mounting system for temporary installation and comes in red, blue, amber, white, and green color options.

## Product Overview

### Professional Emergency Lighting Solution

The LTF8450A LED mini lightbar is a compact and powerful emergency lighting solution designed for police, fire, and emergency response vehicles. Its high-intensity LEDs in a split red and blue configuration ensure exceptional visibility and warning capability in critical situations. The aerodynamic housing reduces wind resistance and noise while the durable polycarbonate lens protects the internal components for long-term performance.

## Technical Specifications

Operating Voltage	12 V DC
Flash Control	Multiple selectable flash patterns via control switch

## Construction & Design

Lens Material	Durable Polycarbonate
Design Features	Aerodynamic, Low Noise, Compact

## Installation & Connectivity

Mounting System	Magnetic base with suction cups
Connection Type	Cigarette lighter plug

## Performance Metrics

### LED Configuration

**2 Split Red/Blue**
