

LED PAR20 Reflector Bulb

This LED reflector bulb is designed for directional lighting applications. It features a standard E26 or E27 screw base for easy installation in compatible fixtures.

Product Overview

High-Efficiency Directional Lighting

The LED PAR20 Reflector Bulb is engineered for precision directional lighting, making it an ideal choice for accent and task illumination. Utilizing advanced LED technology, this bulb offers significant energy efficiency and a long operational lifespan compared to traditional lighting solutions. Its reflector design optimizes light output, while the clear glass lens ensures maximum transmission for crisp, focused beams.

Technical Specifications

Base Type	E26 / E27
Light Source	LED
Lighting Application	Directional, Accent Lighting, Task Lighting

Installation & Usage

Recommended Environments

- Indoor use
- Track lighting
- Recessed lighting
- Display lighting

Lens Material	Clear glass
