

LED Parking Sensor System for Trucks and Buses

This LED parking sensor system is designed for trucks and buses, providing both audible and visual alerts. The system uses ultrasonic sensors to detect obstacles and an LED display to show the distance.

Product Overview

Advanced Parking Assistance for Heavy Vehicles

This LED parking sensor system is specifically engineered for large vehicles like trucks and buses, enhancing safety during maneuvering. It utilizes four anti-jamming digital sensors to provide reliable obstacle detection in various environments. The system features a clear LED display with color-coded alerts and numerical readouts, ensuring drivers can easily judge distances in tight spaces.

Technical Specifications

Detection Range Options

- 1.5m
- 3m
- 5m

Number of Sensors	4
Sensor Technology	Anti-jamming digital ultrasonic sensors

Features & Capabilities

Display Indicators

Green Zone • Yellow Zone • Red Zone • Numerical Readout

Alert Methods	Audible Alert, Visual LED Display
---------------	-----------------------------------

Compatibility

Compatible Vehicles

- Trucks
- Buses
