Product Overview

Professional Grade LED Ceiling Light

This LED ceiling light is engineered for durability and reliable performance in both residential and commercial environments. Featuring a robust plastic lamp body and an integrated optical lens, it ensures efficient light distribution. The design incorporates a convection cooling hole system to maintain optimal operating temperatures and extend product longevity.

Construction & Design

Body Material	Engineer-level plastic
Cooling System	Convection cooling hole design
Optical System	Integrated optical lens

Application

Ideal For	Residential, Commercial, Indoor Lighting
