

LED Rope Light for Architectural and Decorative Use

High-intensity LED rope lights are available in red, blue, and green colors. These lights are constructed with durable, weather-resistant PVC tubing suitable for both indoor and outdoor environments.

Product Overview

Versatile Architectural Lighting

These high-intensity LED rope lights are engineered for both architectural accents and decorative lighting applications. Constructed with durable, weather-resistant PVC tubing, they are suitable for both indoor and outdoor environments. The energy-efficient design ensures a long lifespan, making them an ideal solution for outlining structures and enhancing visibility.

Technical Specifications

Usage

Indoor • Outdoor

Key Features

- High-intensity LED output
- Energy-efficient design
- Long operational lifespan
- Customizable length options

Available Colors

Red, Blue, Green

Material

Weather-resistant PVC tubing
