

# LED Television with High Resolution Display

This LED television provides a vibrant display and sleek design. Its features include high resolution, multiple input options, and integrated speakers for an immersive viewing experience.

## Overview

### High-Performance LED Display

This LED television offers a crisp 1920x1080 resolution on a 23.5-inch panel, making it suitable for both professional and entertainment environments. Designed for smooth performance, it supports high refresh rates of up to 240Hz in 3D mode and provides a rapid 2ms response time to minimize motion blur. With wide 178-degree viewing angles and energy-efficient operation, this display delivers consistent, vibrant image quality.
