

LED Work Light for Automotive and Industrial Use

This rectangular LED work light features a durable black housing and a clear protective lens. Designed for automotive and industrial applications, it provides enhanced visibility in low-light conditions with its high-intensity LED strips.

Product Overview

Professional LED Work Light

This high-intensity LED work light is engineered specifically for demanding automotive and industrial applications. Featuring a robust, rectangular black housing and a clear, impact-resistant protective lens, it delivers reliable illumination in low-light environments. Designed for extreme durability, this light offers superior resistance to vibration, ensuring long-term performance in rigorous work settings.

Technical Specifications

Usage Environment

- Automotive repair and maintenance
- Industrial site illumination
- General heavy-duty workspace lighting

Performance Metrics

1 LED Strip
