

Lever Action Barrel Pump

This hand-operated lever action barrel pump is designed for dispensing fluids from drums and barrels. The pump features a durable construction with a metal body and handle, and includes a discharge spout and a long suction tube to reach the bottom of standard-sized barrels.

Product Overview

Professional Lever Action Barrel Pump

This durable hand-operated lever action barrel pump is engineered for efficient fluid transfer from standard drums and barrels. Featuring a robust metal body construction and an ergonomic grip, it is designed for reliable daily use in industrial or workshop environments. The included discharge spout and extended suction tube ensure precise, controlled dispensing of various liquids, including oils and lubricants.
