Product Overview

Professional Isolation Solution

This lever-operated isolation valve is engineered for reliable performance in HVAC&R applications. It features a full-flow design that ensures optimal fluid dynamics when open and dependable shut-off capabilities for maintenance or repair. Its compact, durable construction allows for seamless installation in confined spaces, making it an ideal choice for diverse plumbing and heating systems.

Technical Specifications

Product Code	E00013
Connection Size	15mm x 15mm
Operation Type	Lever Operated
Flow Type	Full Flow

Features & Benefits

Installation Compatibility

- Copper pipes
- Plastic pipes
- Confined spaces

Key Features	Full Flow Design, Reliable Shut-off, Corrosion Resistant, Compact Design, HVAC&R Compatible
Fitting Type	Compression
