Product Overview

Versatile Wire Rope Pulling Hoist

These lever-operated wire rope hoists are engineered for professional lifting, pulling, and load-positioning tasks. Designed with a focus on operator safety, each unit incorporates built-in overload protection and a robust manual lever system for precise control. With multiple capacity options and customizable rope lengths, these tools are suitable for demanding applications in construction, rigging, and industrial maintenance.

Technical Specifications

Safety Mechanisms

Overload Protection • Manual Lever Operation

Available Capacities	800 kg, 1600 kg, 3200 kg
Standard Rope Length	20 m
Maintenance Requirement	Low maintenance design
Customization	Rope length can be customized upon request
