

# Light-Duty Drill Press

This drill press is designed for drilling operations and features a robust construction for stability. It offers variable speed control and an adjustable worktable to accommodate different materials and workpiece sizes.

## Product Overview

### Versatile Precision Drilling

The ZQ Series Light Type Drill Press is a flexible machine tool engineered for precision and stability. With a robust cast iron base and column, it provides a reliable foundation for various drilling operations in workshops, garages, and small manufacturing facilities. Its adjustable worktable and variable speed control allow for seamless adaptation to different materials and workpiece configurations.

## Technical Specifications

### Safety Components

- Chuck Guard
- Emergency Stop Button

### Construction Materials

Cast Iron Base, Robust Column

## Operational Capabilities

### Drilling Performance

**1 Included**

Adjustable Depth Stop

### Worktable Specifications

- Vertical Adjustment
- Swivel Capability

## Application Suitability

### Recommended Use

Machine Processing • Repair Work • DIY Projects • Light to Medium-duty Tasks
