

Light-Duty Dump Truck for Marine Use

This light-duty dump truck is commonly used in shipbuilding and marine applications for transporting materials and debris. Its compact size allows for maneuverability in confined spaces, while its sturdy construction ensures durability in demanding environments.

Overview

Versatile Transport for Marine Environments

This light-duty dump truck is engineered specifically for the rigorous demands of marine and shipbuilding environments. Its compact chassis design provides exceptional maneuverability in tight, confined industrial spaces while maintaining a robust build for material transport. Equipped with a high-performance hydraulic lift system, it enables efficient and precise unloading of debris and supplies, significantly improving operational workflow on site.

Key Features

Operational Capability

Compact Design • Hydraulic Assisted • High Durability

Primary Applications

Shipbuilding, Marine Construction, Material Handling

Performance Metrics

Hydraulic System

Integrated Hydraulic Lift
