

Light Duty Stainless Steel Ball Valve

This light duty ball valve is constructed from stainless steel 316 and features a blue handle for manual operation. It utilizes a unique valve stem flexible sealing and V-shape packing structure to ensure a reliable seal.

Product Overview

Light Duty Stainless Steel Ball Valve

This light duty ball valve is engineered for reliable flow control in general industrial applications. Constructed from high-quality stainless steel 316, it offers excellent corrosion resistance and durability. The unit features a manual blue handle for intuitive operation and is designed for standard piping systems.

Technical Specifications

Material Grade	Stainless Steel 316
Operation	Manual
Handle Color	Blue
Application Suitability	General Industrial, Flow Control
