

Line Interactive Uninterruptible Power Supply 500-3000VA

This uninterruptible power supply (UPS) with line-interactive topology delivers pure sine wave output. It is available in models ranging from 500VA to 3000VA.

Product Overview

High-Performance Line Interactive UPS

This line-interactive uninterruptible power supply offers a versatile solution for protecting sensitive equipment with capacity options ranging from 500VA to 3000VA. Featuring pure sine wave output and advanced DSP digital control, it ensures reliable power delivery for servers, networking devices, and workstations. The system includes intelligent battery management and robust protection features to safeguard against power outages, surges, and voltage fluctuations.

Technical Specifications

Output Waveform

Pure Sine Wave

Power Capacity Range

500VA - 3000VA

Control System

DSP Digital Control

Key Features

Advanced Functionalities

- Auto sensing frequency
- Settable ECO mode
- Cold start capability
- Auto restart on mains restoration
- No-load shutdown
- Adjustable charging current

Protection Features

Short circuit protection, Overload protection, Voltage stabilization, Boost and buck AVR

Connectivity & Management

Communication Ports

USB, RJ45, AS400, SNMP (optional)

Battery Management

Yes
