

Line Interactive Uninterruptible Power Supply (UPS)

This line interactive UPS provides reliable power protection for sensitive electronic equipment. It safeguards against power outages, voltage fluctuations, and surges, ensuring continuous operation and preventing data loss.

Product Overview

Reliable Power Protection

This Line Interactive Uninterruptible Power Supply (UPS) provides essential power protection for sensitive electronic equipment. It safeguards against power outages, voltage fluctuations, and surges, ensuring continuous operation and preventing critical data loss. Designed for versatility, it is an ideal cost-effective solution for maintaining uptime for computers, workstations, and other critical devices.

Key Features

Core Features

- Wide input voltage window
- Boost and buck AVR
- Cold start function
- Intelligent CPU control
- SMD technology for space optimization
- Intelligent battery management

Safety & Protection

Protection Mechanisms

Short circuit protection, Overload protection, Overcharge protection, Deep discharge protection, Automated charge current regulation

Connectivity & Control

Communication & Software

- Audible and indication lamp alarm functions
- Dry contact communication with monitoring software
- Optional RS232
- Optional USB

Performance

Input Compatibility

Wide input frequency range • Small generator compatible
