

Linear LED Light Fixture

This linear LED lighting fixture utilizes imported 1W LED tubes. It features low consumption, long service life, and over 15 kinds of flash patterns.

Product Overview

Professional Linear LED Solution

The LTF9006B is a versatile linear LED lighting fixture engineered for precise illumination tasks. Featuring a series of high-density LED modules housed within a sleek, black rectangular chassis, it ensures consistent and even light distribution. Its compact form factor makes it an ideal choice for focused or accent lighting applications in commercial and industrial environments.
