Product Overview

Compact Cloud Computing Solution

This thin client is engineered to provide a robust and cost-effective endpoint for virtual desktop infrastructure and cloud computing environments. Powered by the Linux 2.6 operating system, it offers seamless integration for streaming online video and accessing remote applications. Its high-definition HDMI output and multi-language support ensure versatility across diverse global deployment scenarios.

Technical Specifications

Deployment Advantages

- Energy-efficient operation
- Compact hardware footprint
- Versatile connectivity options

Operating System	Linux 2.6
Video Output	HDMI
Capabilities	Cloud Computing, VDI Ready, Online Video Streaming, Multi-language Support
