

Liquid and Gas Meter

This meter is designed for measuring the flow of both liquids and gases. It provides accurate readings for a variety of industrial applications.

Product Overview

High-Performance Recessed LED Panel Light

This recessed LED panel light is engineered for environments requiring high hygiene and visual comfort, such as hospitals, laboratories, and food processing plants. Featuring a glare-free design with a high-grade prismatic acrylic diffuser, it provides consistent, soft light while resisting UV degradation. The unit is built with high-quality components, including a low-temperature, ultra-quiet ballast and flame-resistant wiring, ensuring safety and durability in demanding settings.

Design and Optics

Diffuser Material Options

- Organic Glass
- Frosted
- Soft White
- Prismatic

Optical Features

Glare-free, UV Protected, Consistent Color, Easy to Clean

Technical Specifications

Safety and Compliance

Flame Resistant • High Temperature Resistance • High Voltage Resistance • Environmental Standard Compliant

Ballast System

Low-temperature, ultra-quiet ballast

Applications

Recommended Environments

- Food processing plants
- Dust-free workshops
- Hospitals
- Laboratories
- Kitchens
- Offices
- Shopping malls
