

Liquid Weighing Filling Machine

This liquid weighing filling machine is designed for precise and efficient filling of liquids based on weight. Constructed with stainless steel and featuring a digital control panel, it ensures accurate fill levels, minimizing waste and maximizing productivity.

Overview

Precision Liquid Filling Solution

This weighing-based filling machine is engineered for the precise and efficient filling of liquids. Constructed with durable stainless steel, it ensures high hygiene standards suitable for food processing, cosmetics, and chemical industries. The integrated electronic weighing system minimizes waste by ensuring accurate fill levels, while the user-friendly digital control panel allows for seamless operation and parameter adjustment.

Technical Specifications

Filling Heads	1 head
Operating Pressure	7 Mpa
Anti-Drip System	Mechanical

Key Features

Machine Capabilities	Weighing Filling, High-Dose Filling, Electronic Scales, Economical, Practical
----------------------	---

Application

Suitable Industries

- Food Processing
- Cosmetics
- Chemical Industries
