Overview

High-Efficiency Smart Charger

The C600B is a high-performance smart charger designed for efficient and reliable battery maintenance. Housed in a durable aluminum alloy casing, this 600W unit provides stable power output suitable for various battery chemistries, including Li-ion, LiFePO4, and lead-acid. It features integrated safety protections and clear LED status indicators, making it an ideal solution for electric motorcycles, scooters, and e-bikes.

Performance Metrics

Output Power

600 W

Total Power

29.2 V

Output Voltage

18 A

Output Current

Technical Specifications

Supported Battery Types

- Li-ion
- LiFePO4
- Lead Acid

Input Voltage Range

110-132VAC, 200-264VAC

Physical Attributes

Dimensions

135 x 90 x 50 mm

Net Weight

0.9 kg

Housing Material

Aluminium Alloy

Features & Compliance

Certifications

CE • RoHS

LED Status Indicators

Status	Color
Charging	Red
Fully Charged	Green

Warranty

12 months

Application

Compatible Applications

Electric Motorcycle, Scooter, E-bike
