

Lithium-Ion Replacement Battery

This high-capacity lithium-ion battery is designed as a replacement for Sony NP-F550 and NP-F570 batteries. It operates at 7.2V and has a capacity of 2100mAh, providing extended power for compatible Sony cameras and devices.

Product Overview

High-Capacity Replacement Power

This high-capacity lithium-ion battery serves as a reliable replacement for standard NP-F550 and NP-F570 battery models. Engineered to deliver consistent 7.2V power, it ensures your compatible cameras and devices remain operational during extended use. With a capacity of 2100mAh, it provides the energy density required for professional-grade field work and studio applications.

Technical Specifications

Voltage	7.2 V
Capacity	2100 mAh
Battery Chemistry	Lithium-Ion

Compatibility

Compatible Models

- NP-F550
- NP-F570

Usage Guidelines

Important Note	Please use only the specified charger recommended for this battery type to ensure safety and performance longevity.
