

Lithium Jump Starter and DC Power Source Kit

This portable kit provides a power solution for jump-starting vehicles and powering various DC devices. It includes a compact jump starter unit, jumper cables, multiple charging adapters and a user manual.

Overview

Versatile Portable Power Solution

This high-capacity lithium jump starter and DC power source kit is designed for professional and personal use, providing reliable power for jump-starting vehicles including cars, trucks, motorcycles, and boats. Beyond emergency vehicle starting, it serves as a robust portable power bank for charging essential electronic devices like smartphones, tablets, and laptops. The kit comes complete with a comprehensive set of charging adapters and jumper cables, all organized in a compact carrying case for easy transport and storage.

Technical Specifications

Model Number	IMF330
