

Lithium Polymer Battery 3.7V 950mAh

This high-capacity lithium polymer battery is designed for portable electronic devices. It features a nominal voltage of 3.7V and a capacity of 950mAh.

Overview

Reliable Power Solution

This high-capacity Lithium Polymer battery is engineered to provide dependable power for portable electronic devices. With a nominal voltage of 3.7V and a capacity of 950mAh, it serves as an efficient energy source for smartphones, tablets, and various rechargeable gadgets. Its compact design ensures long-lasting performance in demanding mobile applications.

Electrical Specifications

Nominal Voltage	3.7 V
Capacity	950 mAh
Battery Chemistry	Lithium Polymer (Li-Po)

Identification

Model Identifier	LI053450AR
------------------	------------

Applications

Common Applications	Smartphones, Tablets, Portable Electronics
---------------------	--
