

Local Communication Cable

This local communication cable is designed for reliable data transmission. It is manufactured under GB/T13849.1 5-1993 standard.

Product Overview

High-Performance Local Communication Cable

This local communication cable is engineered for reliable data transmission in demanding environments. Featuring a robust outer jacket for superior environmental protection and multiple internal conductors, it ensures optimal signal integrity and minimal loss. Its compact design facilitates easy installation, making it an ideal solution for networking, telecommunications, and high-bandwidth data applications.

Technical Specifications

Key Design Features

- Robust outer jacket
- Multiple internal conductors
- Compact design
- High-quality material construction

Suitable Applications

Networking, Telecommunications, Data-Intensive Applications, Indoor, Outdoor

Performance

Performance Highlights

0 Low

Signal Loss

1 High

Bandwidth Capacity
