

Long Life Battery Feature Phone

This feature phone is designed for extended battery life. It features a classic candybar design with a physical keypad and a color display.

Overview

Reliable Communication Solution

This feature phone is engineered for users who prioritize longevity and reliability in their daily communication tools. With a robust 2000 mAh battery, it offers extended standby and talk times, making it an ideal choice for field workers or those in remote areas. The classic candybar design ensures ease of use, while essential multimedia features provide added utility.
