

Long Nose Pliers with Insulated Handle

These long nose pliers are designed for gripping, bending, and cutting wires and small components in tight spaces. The handles are insulated for electrical safety, making them suitable for electricians and professionals working with electrical circuits.

Product Overview

Professional Long Nose Pliers

These long nose pliers, also known as needle-nose pliers, are essential hand tools designed for precision tasks in tight spaces. Featuring elongated jaws that taper to a fine point, they offer exceptional control for gripping, bending, and cutting wires or small components. The ergonomic, insulated handles ensure comfort and electrical safety, making them a reliable choice for electricians and professionals working with electrical circuits.

Design & Features

Key Features

- Elongated jaws for confined areas
- Insulated handle design
- Ergonomic grip for reduced fatigue
- Durable steel construction

Safety Certification

Insulated Handle
