

Low Noise Diesel Power Generator

This low-noise diesel generator is designed for reliable and efficient power generation. It features a robust diesel engine coupled with a high-performance alternator, all enclosed in a sound-attenuating enclosure to minimize noise levels.

Overview

Professional Low Noise Power Generation

Engineered with advanced acoustics and airflow technology, this low-noise diesel generator provides reliable power in noise-sensitive environments. The compact, sound-insulated design ensures excellent performance with minimal disruption, making it ideal for telecommunications, banking, construction sites, and airports. Featuring a solid-seal automatic voltage regulator (AVR) and robust construction, this unit offers simplified maintenance and versatile operation modes.

Technical Specifications

Compatible Engine Brands	Cummins, Deutz, Perkins, Mitsubishi, Daewoo, Volvo, Weichai, JiChai
Generator Type	TFW Series Three-Phase Brushless Synchronous
Voltage Regulation	Solid seal automatic voltage regulator (AVR)

Features & Configuration

Key Features

- Sound-attenuating enclosure
- Automatic voltage regulation
- Compact and lightweight design
- Easy maintenance access
- Overload protection
- Low oil shutdown

Start-up Options

Electric Start • ATS Automatic Transfer

Application

Common Applications	Telecommunications, Banking, Construction, Airports
